

KRB GLULAM BEAMS are produced by Holzwerke Bullinger in Neuruppin, Germany. Founded by owners Andreas and Stefanie Bullinger in 1993, the company today has a 30-acre site with over 377,000 sq. ft. dedicated to its state-of-the-art production facility.

Our production capabilities include: 16 hot presses, 10 kiln dryers, a **MSR** machine that evaluates all of our lumber and two finger jointing lines.

KRB GLULAM has an intensive in-plant quality control program that verifies that all production meets the ANSI/AITC: A190.1 standard. PFS Corporation, 2402 Daniels Street, Madison, WI 53718, provides third party inspection services as our compliance assurance and inspection agency for structural glued-laminated timber.

Our lumber resource is Norway Spruce. This raw material is easy to work with and glue. It provides high strength laminates that create a high-quality glulam beams with consistent and predictable strength and dimensional stability, as well as being very easy to work with in the field. All of this leads to significant design and economic advantages. While our product is manufactured for industrial applications, it can also easily be used in architectural framing applications.

Kullik & Rullmann, an alliance of several German sawmills and high-tech wood working producers, including Holzwerke Bullinger, export their timber products worldwide. Kullik & Rullmann is ISO 9001:2000 certified and guarantees the best service worldwide. An online tracking system gives every customer the ability to find out details about their order status anytime, anywhere. The name **KRB GLULAM** is an abbreviation on behalf of the "Kullik-Rullmann-Bullinger" Corporations.

Finnforest USA, Engineered Wood Division, located in Roseville, Michigan, is proud to represent and distribute **KRB GLULAM** throughout the U.S. and Canada. Contact your Finnforest USA representative for more information about LVL Beams & Headers, Scaffold Plank and related engineered wood products.
